Gauge The Possibilities.

ProGauge MagLink LX Plus® console.

MagLink LX Plus® console

Visit Website

Experience the Best.

The ProGauge MagLink LX Plus® console, from Dover Fueling Solutions® (DFS), comes with a brilliant 7” color display and intelligent “touch and swipe” technology.

The MagLink LX Plus features enhanced scalability, flexibility and connectivity. What are you waiting for? Transform your fuel management and inventory and compliance monitoring capabilities, today!

ProGauge®

Flexible. Scalable. Interactive. Global.

It's Flexible.

The MagLink LX Plus console is an advanced tank gauge system with extended features, based on a modern, performing and secure platform. It offers flexible configurations for use in a variety of fuelling environments, whether wired or wireless, and functions efficiently with environmental sensors. Additionally, multiple Point-of-Sale (POS) interfaces are supported to ensure advanced reconciliation. This provides more flexibility when it comes to connecting your console to your forecourt equipment, and even greater monitoring coverage through a single user interface. The MagLink LX Plus console is manufactured with the inbuilt capability to support all legacy probes from DFS, including legacy OPW® Fuel Management Solutions (FMS) models.

It's Scalable.

The MagLink LX Plus is a console designed to be scaled up. With base monitoring capabilities of up to 12 probes (coupled with patented multi-drop technology, which reduces installation costs), this console can be easily enhanced to add Continuous Statistical Leak Detection (CSLD), Electronic Pressurised Line Leak Detection (PLLD), relays or input connections, and up to 48 sensors.

It's Interactive.

The MagLink LX Plus' touchscreen enables you to effortlessly move between screens to easily view all of your tank data through its new and improved graphical display. This, alongside with a brighter screen, faster processor and simplified reporting capabilities makes it one of the most advanced tank gauge consoles on the market.

It's Global.

Utilising a robust global platform, the MagLink LX Plus console personifies global consistency, while still being able to provide the regionally specific features you need, including meeting your environmental and compliance needs.

It's Eco-Friendly.

The MagLink LX Plus console features precise algorithms to ensure sites are monitored and protected, 24/7, to the most stringent industry standards. Tank static and continuous statistical leak detection (SLD and CSLD), as well as pressure line leak detection (PLLD) are available as standard with every system. Site owners can perform leak tests on pressure lines, directly via the console. Advanced PLLD features monitor pressure in the product lines during fuelling cycles and idle periods.

Features and Functions.

ProGauge MagLink LX Plus® console.

Features and Functions.

- User-friendly interface with new intelligent 'touch and swipe' navigation
- Calendar feature for deliveries, alarms and warnings, which can be filtered by event and/or tank
- Supports up to 12 probes (up to 6 of the 12 probes can have CSLD enabled)
- Supports both wired and wireless probes on the same system*
- Probe types supported: ProGauge® DMP™ Magnetostrictive Probe(s), and OPW FMS 924B and 924A probes
- Can monitor manifolded or grouped tanks
- Automatic Calibration and Reconciliation (ACR) to reconcile fuel use and deliveries (point-of-sale (POS) interface required)
- Displays tank volume, TC volume, ullage, water, density (additional density float required) product level and water level, and product temperature for individual tanks
- Automatic leak detection (POS connection not required)
 - EPA certified for 0.1 gph and 0.2 gph static tank leak detection
 - EPA certified for 0.1 gph, 0.2 gph and 3.0 gph pressurised line leak detection (PLLD). Up to 8 pressure lines are supported
 - EPA certified for 0.2 gph Continuous Statistical Leak Detection (CSLD)
 - Leak detection scheduling by day/week/month
 - Local or remote PC connection
 - Continuous product line pressure monitoring
- IFSF support (additional external interface required)
- Audio, visual, email and printed alarm notifications
- Console configured through a web interface. No added hardware or proprietary software needed
- Web interface-optimised for handheld devices (mobile and tablet)
- Network connectivity: DHCP and static addressing
- 2 x relays on board
- Optional input/output module expands functionality adding a maximum of 32 relays or 32 input connections*
- Monitoring sensors supported (wired and wireless)*
- Reports include: inventory, deliveries, tank history, leak test, shifts, reconciliation and sales
- Configurable to meet local settings (date/time formats and metric/imperial units)
- Communicates with most industry-standard third-party POS protocols (Serial and/or Ethernet)
- Optional aqueous ethanol float (AEF) detects potential phase separation
- Product density support via optional Density kit

- Systems updates can be applied via USB (or remotely)
- Enabled for wetstock monitoring services (ClearView™, Fairbanks®, DX Wetstock®, or 3rd party)
- Driver display option, external display for tanker drivers
- Printer options: USB or Serial
- Communication ports;
 - 2x RS 232 communication port
 - RS 485 communications port
 - Ethernet port
 - USB port

**Subject to regional availability*
