Get Smart.
Go Magnetostrictive.

The success of our probes is no secret. Using magnetostrictive technology, our probes provide continuous and highly accurate readings of liquids inside of the tank. Dover Fueling Solutions® (DFS) offers a complete range of probes that can fit any use case or application. From standard intrinsically safe probes—available in wired or wireless versions for all products and commonly used at fuel retail stations—to explosion-proof designs for industrial applications, ProGauge® provides solutions whatever your site configuration or needs.

ProGauge® | DOVER® FUELING SOLUTIONS

Wired or Wireless?

We believe in choice. That's why we offer both wired and wireless probes.

ProGauge® DMP™ Magnetostrictive Probe(s).

This is our most accurate and advanced probe, capable of enabling precision leak detection, density measurement and ethanol phase separation. It is suitable for both above- and below-ground tanks, and supports multiple fuels and additives. It can be bundled with the ProGauge® DMP™ MagRF* wireless unit to facilitate installation and help overcome wiring limitations. This probe comes with a standard RS485 interface (fast and reliable data transmission), or with a "1-wire" communication option.

**subject to regional availability*

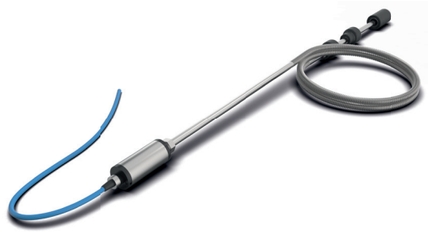

ProGauge® Magnetostrictive XMT-RF Probe.

Our inventory only wireless Magnetostrictive XMT-RF liquid level probes are perfect for sites wishing to avoid expensive digging, wiring, and cabling costs. They are able to transmit data up to 80m from underground tanks—a distance which can be extended to 800m with the aid of an additional above ground RF receiver—and are well-equipped and rigorously tested to manage environments where wireless coverage is typically limited.

ProGauge® XMT Exd Probe.

The XMT-Exd explosion-proof probe is ideal for monitoring liquids across many industrial sectors, no matter how challenging the environment. This probe can monitor almost all known liquids including those which are considered volatile, resins, chemicals, and food and drink products.

ProGauge® DMP Flex™ Magnetostrictive Probe(s).

The ProGauge DMP Flex Magnetostrictive Probe(s), is a practical, cost-effective and adaptable product that relays incredibly precise readings of the fuel and other liquids inside your tank. This probe is perfectly engineered to fit more challenging environments, such as tight or difficult-to-access spaces or tall outdoor tanks. It can be bundled with the DMP MagRF* wireless unit to facilitate installation and help overcome wiring limitations.
