

## “Deploy-Anywhere” Forecourt Control for Your Virtualization Goals

DX Control™ Forecourt Controller is a container software solution providing high availability and redundancy without additional complex and specialized hardware.

DX Control delivers software updates without interrupting operations and is OS-agnostic, allowing customers to bring their own preferred hardware and container management platform.

DFS Edge 100  
on-premise device  
option with container  
management platform

AvaLAN™ FCB IoT  
enabler, putting  
dispensers on separate  
comms loops

Enables easier and  
more seamless  
redundancy setup

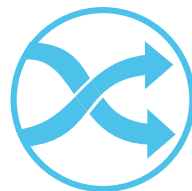

Quick and standardized  
mass deployments  
and updates

Less hardware and  
switchover costs

On-premise or cloud  
deployment options

Solution integrations are  
less complex using  
Conexus protocol

Easily update site with  
DFS DX® connected  
solutions platform
