The Future Is Here

In today's society, easy, fast and convenient fuel retail shopping is not only desired but expected; the requirements of consumers are evolving and they are demanding an exceptional shopping experience. Introducing the Dover Fueling Solutions® (DFS) Self-Checkout Kiosk, DFS' answer to changing business needs and consumer demands.

While it may seem difficult to introduce a self-checkout on the forecourt, DFS has designed a cost-effective solution that fits seamlessly with the in-store experience. The fast-paced nature of the DFS Self-Checkout solution makes the retail experience quicker, giving customers the option of avoiding long queues elsewhere. As a "plug and play" extension to your existing point-of-sale (POS) system, the DFS Self-checkout offers customers with the ability to pay for shop items, car washes and fuel in one transaction.

The DFS Self-Checkout Kiosk is the ideal solution for retailers looking to modernized and optimize stores on their forecourt. With a focus on speed, convenience and simplicity, this new experience will drive repeat sales and long-term loyalty from your customers. Are you ready to take a step towards the future?

An Exceptional Shopping Experience

Happy Customers

Queuing is a key frustration for consumers; self-checkout kiosks are faster than conventional staffed cashier solutions and allow customers to scan and pay for their goods in much less time. For the merchant, this means more completed transactions per hour and greater overall profit margins.

Better Use of Personnel

A single employee can supervise multiple self-checkout kiosks, assisting consumers only when needed. Switching to a DFS Self-Checkout kiosk can lower the merchant's labor costs due to the need for fewer staff. It also allows merchants to redeploy employees to other areas, improving business efficiencies.

Speed and Simplicity

The DFS Self-Checkout solution is ideal for consumers who have a small number of purchases to make and wish to pay by card, making it ideally suited for the fuel and convenience retail sector.

Less is More

Secure, integrated payment solutions help to increase your retailing options, facilitate effortless payment, promote a safer store environment and contribute to increased margins.
