Celebrating Our Evolving Legacy

Every company has a history. Some long, some short, some interesting, some mundane. But very few companies have a history of actually making history. That is of imagining and producing products and solutions that don't just change an industry but change how people live their everyday lives.

There is probably not a motorist anywhere in the world that hasn't, at some point, used a piece of equipment manufactured by Dover Fueling Solutions® (DFS), or our legacy brands, and this year we are proud to celebrate some significant milestones:

- [10 years of DFS](#)
- [30 years of Fairbanks®](#)
- [125 years of Tokheim®](#)
- [135 years of Wayne®](#)

That's a lot of history. 300 years, in fact, of combined heritage, experience, and innovation packed into one company, not to mention progress, but each of these anniversaries represent more than just "time passed". They stand for generations of individuals who have built, adapted, and reimagined what's possible within our industry. They represent a legacy of craftsmanship, innovation, and trust. One we will continue to shape together. These anniversaries are a reminder that everything we do today, builds on the work of those who came before us and sets the stage for what's to come next.

It's incredible to think about how much has changed over the years. But what hasn't changed is the importance of people: the ideas, the partnerships, the conversations. That's what really drives everything, including our business, forward.

This ebook is a reflection of the remarkable legacy that has brought us here and is dedicated to all past, present, and future DFS employees, partners, and customers.

An Enduring Commitment to Excellence

As we celebrate these important anniversaries, we reflect on a heritage defined by unrivalled expertise, uncompromising quality, and trust earned over generations. Yet our legacy is not simply about where we have come from, it's about how we have evolved, embracing innovation while staying true to the values that have always set our brands apart. Today, that legacy continues to grow: informed by experience, inspired by what's next, and driven to by an enduring commitment to excellence.

Connect

In this industry, experience carries weight. As the needs of the industry evolve, the knowledge we have built over several decades provides the insight to what matters now and anticipate what comes next. Our legacy is more than just history, it is the expertise, trust and proven understanding we bring to every challenge. We are a partner with the experience to deliver with confidence, the knowledge to evolve and the innovation to help shape the future of fuel retail. DFS is, and has always been connected to our customers and our partners, to ensure we deliver the right products and solutions to meet their needs. Today, we are connecting our legacy expertise with the modern needs of our customers, motorists, and the fuel retail and convenience industry.

Innovate

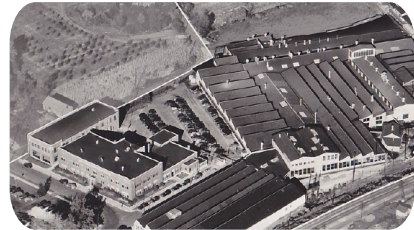

Legacy and innovation are not opposites; they are what has kept DFS and our brands relevant for more than 135 years. That experience gives us the knowledge to innovate with purpose, building on what we know, while never standing still. Because for DFS innovation isn't new. It's been part of our DNA since the very beginning, and it's what will continue to shape our future. We turn the knowledge and experience generated over the last century into technologies, services, and solutions that move the industry forward.

Evolve

For generations, DFS has evolved its brands, products and solutions alongside the changing needs of our customers and the industry. Our Tokheim, Wayne, and Fairbanks brands embody decades of trust, quality, reliability, performance, and expertise, with each bringing a distinctive heritage and proven contribution to the fuel retail and convenience industry. These brands have earned the trust of customers around the world and continue to set the foundations for what comes next. Their value is greater than the products they deliver; it's the confidence of dependable performance, the efficiency of proven solutions, the depth of specialist expertise, and the long-term value created for our customers. Evolution is intentional. We are helping our customers and the wider industry evolve, shaping the fuel retail experience today to meet the demands of consumers tomorrow.

Wayne Fueling Systems®, is a leading fuel retail brand, widely recognised for technology leadership and innovation. Founded in 1891 – in Fort Wayne, Indiana – Wayne is considered one of the most renowned brands in the market.

For over 135 years, Wayne hasn't just evolved with the times; they've led the way. As a global brand, Wayne consistently explored higher quality materials, improved manufacturing techniques, and technological advances that translate into better products, services, and solutions. Today, as part of DFS, Wayne manufactures products and technology solutions designed to solve future challenges.

1891

The Wayne Oil Tank and Pump Company is established in Fort Wayne, Indiana, building new model pumps and quickly adapting them to dispense gasoline as combustion engine cars arrive.

1907-1910

Wayne introduces its first designated gasoline pump and opens a major manufacturing plant in Fort Wayne.

1918

In 1918, the company introduces the first "visible" gas pump (Model 519), allowing drivers to see fuel before it enters their vehicle. In 1919, Wayne establishes a sales office in Toronto, Canada before moving into larger quarters and sets-up service and warehouse facilities in 1925.

1920s

In 1924, Wayne sets up a sales office in London, with manufacturing established in Sydenham in 1927. In 1926, the first integrated unit, combining a mechanical meter and a dial-type gauge into a single dispensing system, was released.

1930s

Wayne subsidiary, Equipamentos Wayne do Brasil, S.A. was set up in a small Rio de Janeiro storefront. In 1932, Wayne launches the revolutionary price-computing pump (Model 40). In 1934, the first Wayne pumps are sold in Africa. In 1935, Wayne releases Model 60, the "world's most beautiful pump". In 1937, Australia was licensed to manufacture gasoline pumps and operate as Wayne Pumps Australia, Limited.

1940s

When war was declared gasoline pumps were built 100% locally and supplied to the RAF and, as specialised contractors to the Air Ministry, Wayne UK installed large petroleum dispensing plants on RAF airfields.

1950 - 1960

In 1959, Wayne establishes itself in Germany, becoming known as Wayne Einbeck. The same year, Wayne releases Model 511, the world's first blending pump. In 1967 a new Wayne factory was built in Rome, Italy.

1970s

In 1970, Wayne acquires AB Ljungmans Verkstader, in Malmö, Sweden. In 1972, Wayne releases Star Ultra U20 dispenser. In 1975, Wayne expands its product line into the electronic-pump computing and self-service systems field— launching the Decade system. The release of the Star 77 dispenser in 1977 marks the integration of microprocessors into the Star dispenser line.

1980 - 1990

In 1982, Wayne introduces the DL Series dispenser with a high hose placement, while moving to it's current head office in Austin, Texas. In 1991 Wayne releases the first of its Wayne Vista™ series fuel dispensers. Wayne develops and releases the Decade 2400, the Wayne Plus™ POS system and the Wayne Nucleus™ POS system.

2000s

In 2002, Wayne released the Wayne Global Star™ fuel dispenser line, followed by the launch of Wayne Ovation fuel dispensers in 2003. In 2004, Wayne launches the Wayne Reliance™ and Select™ fleet dispensers, before releasing the Wayne Fusion™ forecourt system and Wayne iX Pay™ in 2009. Also in 2004, Wayne forms a joint venture in China and establishes the Wayne plant in Rio de Janeiro.

2010

2010 marked a major milestone when it produced the 500,000th fuel dispenser from its Rio de Janeiro facility. A gold-painted dispenser was built to celebrate 80 years of success and growth in the Latin America market.

2011 - 2013

In 2011, through a partnership with Gas Station TV (GSTV), Wayne introduces the inOvationTV™ media platform. Wayne then releases the Wayne TAP™ contactless / NFC reader in 2013.

2014

Wayne launches the Wayne Helix® fuel dispenser line.

2016

Dover Corporation completes the acquisition of Wayne, so the brand becomes part of Dover Fueling Solutions (DFS).

Your Eyes See Visible Proof of Mechanically Accurate Measure.

With over 250 years of expertise, Wayne® fuel dispensers give retailers choice, all backed by leading tech. From fuel dispenser pumps to advanced gasoline dispensers, these solutions are:

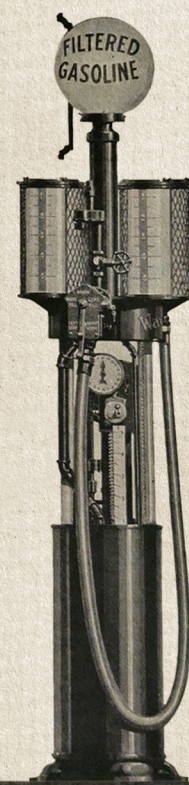

- Made for efficiency and reliability.
- Connected with forecourt technology to ensure smooth operations and remote monitoring.
- Designed with the customer in mind to create a fast and easy refuelling session.

Wayne Century® 3 fuel dispenser

Tokheim is a premier brand in fuel retailing solutions, renowned for delivering exceptional quality for over 125 years. This commitment to excellence is deeply embedded in the brand's legacy and is symbolised by the word "Quality" co-branded into its iconic logo.

Since 1901, Tokheim has leveraged a unique pool of real-world data to drive everything from product development to after-sales support. Today, as part of DFS, the brand's global presence continues to evolve, embodying true engineering excellence worldwide.

1898

John J. Tokheim conceives the first gasoline dispensing pump for automobiles, "the Dome", and installs the first underground gasoline storage tank.

1901

The Tokheim Manufacturing Company is incorporated in Cedar Rapids, Iowa, receiving an early patent for a visible measuring pump.

1906

Introduction of a combination visible and cylinder measuring pump featuring a breakthrough mechanical counter and three-way discharge valve.

1918 - 1938

Executives from Fort Wayne, Indiana, purchase the company and relocate operations in 1918. Debuts Model 50 "Victory" in 1925 before going on to release Model 34 in 1933, and Model 39 in 1938.

1940-1960

Tokheim supports the wartime efforts and produces various materials for RAF during WWII. Introduces Model 39 for post-war stations in 1949 before debuting the Model 300 series in 1950, and Model 1000 in 1960.

1970s

Tokheim markets an alternative bicycle gearing system (the Tokheim Gearmaker / gearing system) during the oil crisis era. Launches MEMS (Modular Electronic Marketing System) in 1974, marking Tokheim's first electronic dispenser line.

1990s

Tokheim introduces the Premier series in 1990, opens a manufacturing site in Dundee, Scotland in 1995, and acquires Schlumberger Retail Petroleum Systems (RPS) in 1998.

2003 - 2005

Tokheim releases Tokheim Quantum 100 to 500 series in 2003, and completes new joint venture in India and China in 2005.

2007 - 2008

Tokheim Crypto VGA® OPT (outdoor payment terminal) is released, the first in the world that is PCI UPT approved. This is followed by the release of the Tokheim Quality Calculator™ (TQC) and Tokheim Quality Meter™ (TQM) in 2008, alongside the start of clean energy production (LPG).

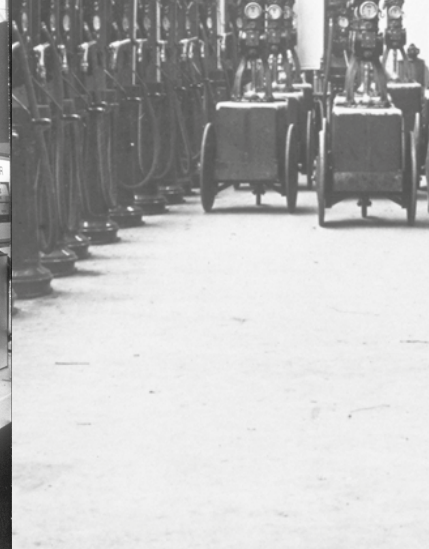

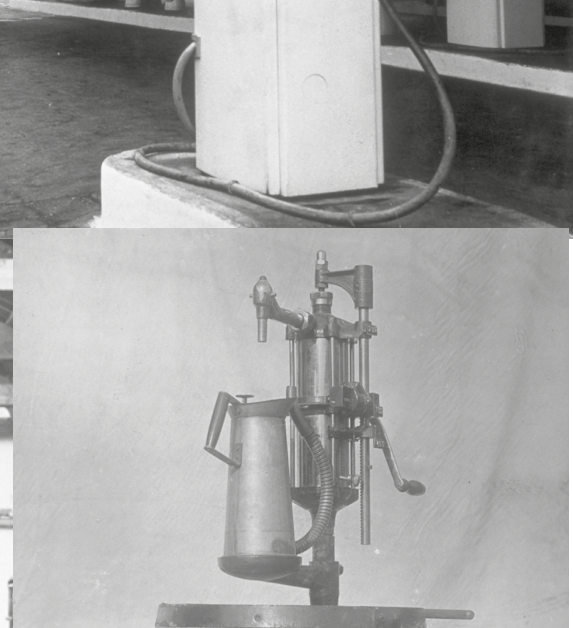

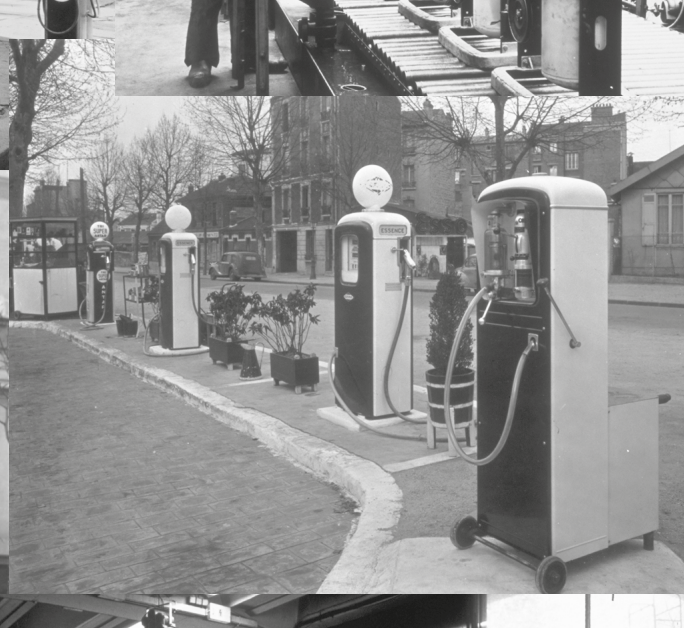

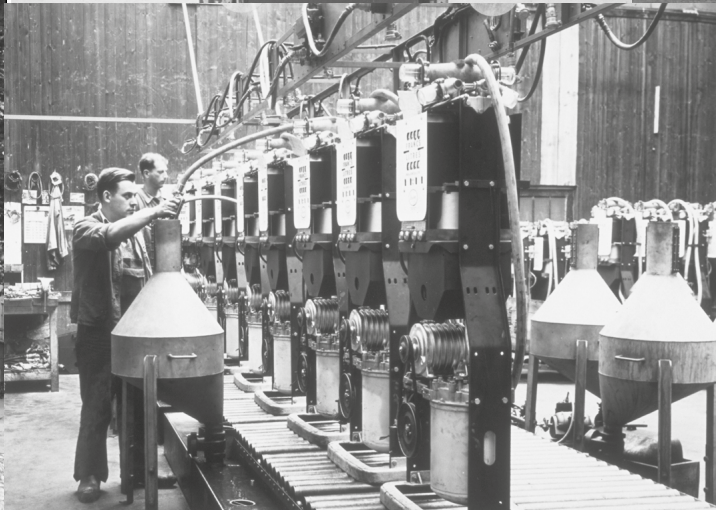

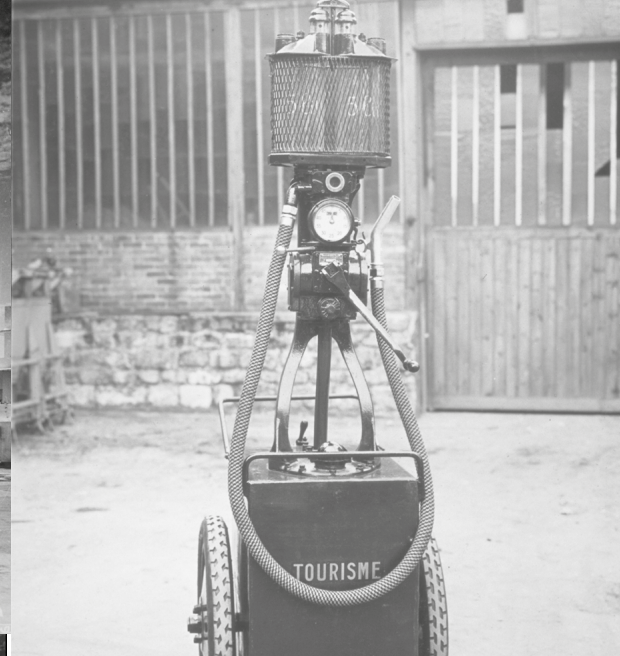

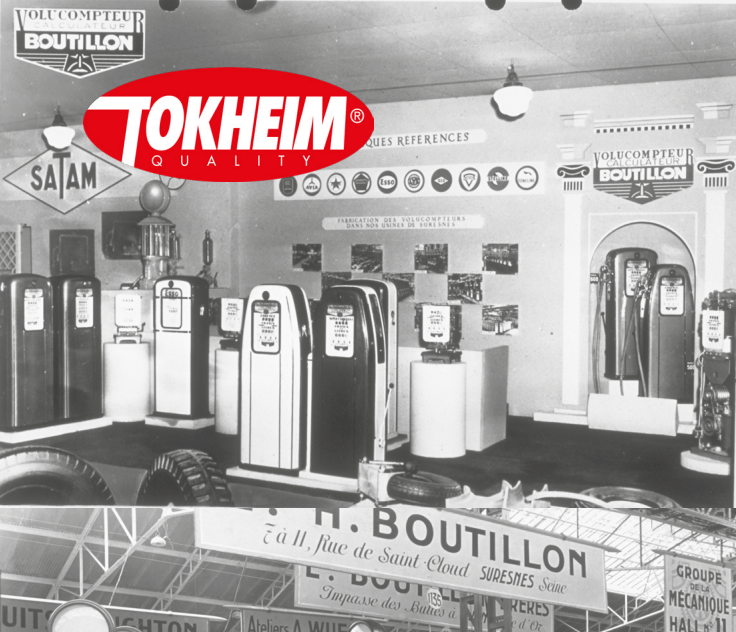

2010 - 2015

Tokheim releases the Tokheim Quantum® 510M series, introducing cloud-ready media screens before launching the Tokheim Quantum® AdBlue® dispenser in 2015.

2016

Dover Corporation completes the acquisition of Tokheim, so the brand becomes part of Dover Fueling Solutions (DFS).

Fairbanks has been synonymous with wetstock and leak detection services since its inception in 1996.

For over 30 years, Fairbanks has expanded its automated monitoring techniques, underground storage tank testing, and data analysis to serve independent operators, hypermarkets, and major multinational oil companies. Today, as part of DFS, Fairbanks is supported by a strong, global network of licensees and distributors that ensures wetstock and analysis services can be offered in even the most remote locations.

1996

Fairbanks Environmental Limited is founded in Skelmersdale, Lancashire, UK, as a local UK start-up to introduce remote wetstock management.

2013

Fairbanks is awarded Business of the Year at the BIBAs. In the same year, the company achieves ISO 14001 and BH OHSAS 18001 for Environmental Health and Safety.

1997 - 2003

In 1997, Fairbanks obtains first SIR certification.
In 2003, Fairbanks wins the Queens Award for Enterprise: Innovation.

2014

Red Rose Awards crown Fairbanks the winner in the International Business Achievement Category.

2007

Fairbanks launches real-time monitoring solution.

2015

Fairbanks licensees open in Canada and South Africa. In the same year, Fairbanks achieves ISO 27001 for Data Security and launches Station Manager 365 (SM365).

2010

Tokheim acquires Fairbanks and in the same year, Fairbanks launches iBank, a real-time data collection system following a major global rollout and partnership with the Tokheim Group.

2016 (early)

The Fairbanks network expands rapidly to cover key motorway service operators and retail chains, including a notable contract win with Welcome Break motorway forecourts. Now, the Fairbanks licensee system monitors over 13,000 stations globally.

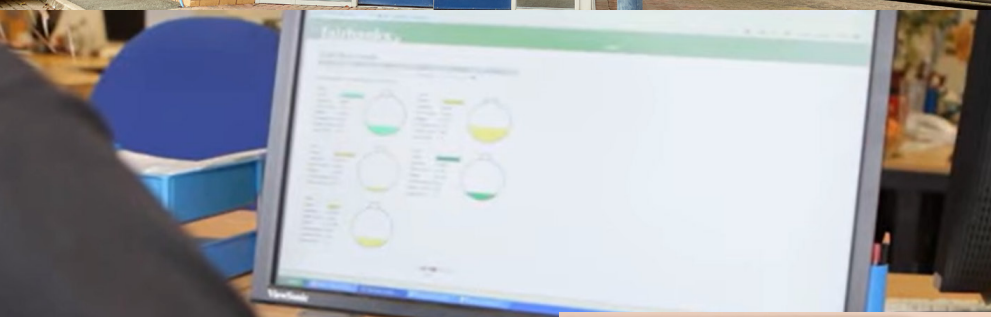

2012

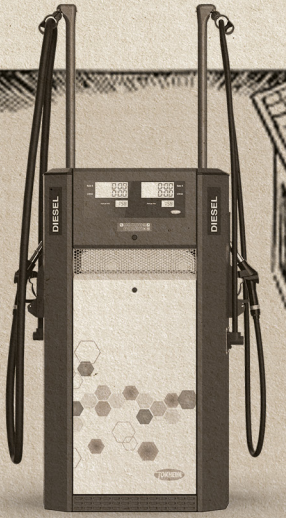

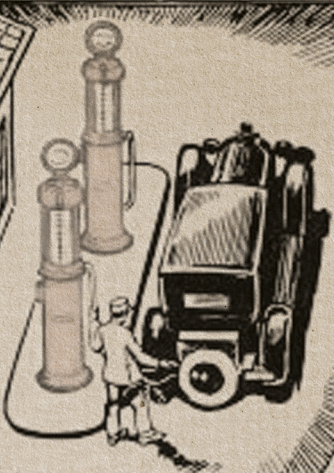

Fairbanks secures a major three-year global wetstock contract with Shell. Partnering with dispenser manufacturer Tokheim, Fairbanks deploys its remote wetstock monitoring and SIR analysis across more than 3,000 service stations spanning 25 countries and three continents.

2016

Dover Corporation completes the acquisition of Tokheim and Wayne, forming Dover Fueling Solutions (DFS). Fairbanks is officially integrated as a foundational cornerstone of the Wetstock Management division of DFS.

Victory Visible Gasoline Dispensers Are Brilliantly Illuminated.

With the Tokheim Quantum® fuel dispensers, every detail is taken into consideration to minimise site downtime and installation costs, making the process (and cost) of change as streamlined as possible.

Dover Fueling Solutions® (DFS) was formed in 2016 when Dover Corporation consolidated its major global acquisitions in the fuel dispenser and convenience retail sector. Today, DFS remains part of Dover Corporation and is a leading provider of advanced energy dispensing equipment, electronic automation, point-of-sale and payment systems, automatic tank gauging and subscription solutions to fueling and convenience retail customers worldwide. Comprised of brands Wayne®, Tokheim®, OPW®, ClearView™, PetroVend®, ProGauge®, Fairbanks®, AvaLAN Networks™, LIQAL®, Bulloch Technologies®, and SitelQ™, DFS is dedicated to offering a broad range of solutions that power vehicles, including conventional fuel and clean energy products that support gasoline, diesel, bio-diesel and ethanol as well as LNG, H2, LPG, CNG and EV chargers.

Headquartered in Austin, TX, DFS has a strong global manufacturing and technology development presence, including facilities in Brazil, Canada, China, India, Italy, Poland, Belgium, Sweden, the Netherlands, the United Kingdom, and the United States.

2016

DFS was officially formed in December 2016 by Dover Corporation, after completing several acquisitions. The global headquarters for [DFS](#) was established in Austin, Texas.

2017

DFS opens a manufacturing plant in Navi Mumbai, India. It spans 90,000 square feet and has the capacity to produce 20,000 dispensers per year. In addition [Tokheim Crypto VGA® OPT](#) (outdoor payment terminal) becomes first OPT awarded PCI PTS 5.X, while in the same year [Wayne iX Pay™](#) obtains PCI PTS 4.1 certification for encrypting PIN pad devices.

2018

DFS exhibits entire portfolio of products at UNITI Expo, the first exhibition where all brands are represented under DFS while introducing a complete EMV® solution at PEI/NACS show. The same year, Crypto VGA OPT is awarded new Mastercard® Terminal Quality Management (TQM) statement of compliance.

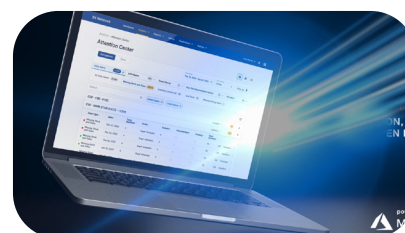

2019

DFS launches Tokheim Quantum® 510M fuel dispenser series. In the same year, DFS showcases all leading product brands at PEI/NACS for the first time and DFS Rio manufacturing facility is named the Gold Dover Safety Excellence award winner.

2020

DFS launches several products including [DFS Self-Checkout Kiosk](#), [ProGauge® DMP™ Probe](#), [ProGauge MagLink LX 4® console](#), and the ground-breaking [Anthem UX®](#) User Experience Platform for [Wayne Ovation®](#) fuel dispensers.

2021

DFS completes acquisition of LIQAL B.V and [AvaLan® Wireless Systems](#), while opening a brand new factory in Milan, Italy to consolidate ProGauge and Wayne locations into one modernised manufacturing and office space. The very same year, DFS launches the DFS DX® connected solutions platform (featuring [DX Wetstock®](#), [DX Retail®](#), [DX Monitor®](#), [DX Promote®](#), [DX Fleet®](#)), [DFS Fusion® automation server version 3](#), [ProGauge® DMP™ Flex Probe](#) and [PV 300E EMV](#) compliant island payment terminal.

2022

DFS launches [DFS Prizma®](#), [ProGauge MagLink LX Plus® console](#), and a brand new [Tokheim Quantum®](#), [Wayne Helix®](#) and [Wayne Century 3®](#) fuel dispenser ranges. In the same year, DFS announces E40 upgrade to Ovation fuel dispensers and collaborates with Bottomline to offer a complete end-to-end fuel management solution — [BX™ Platform](#).

2023

DFS collaborates with Click & Find to deliver cutting-edge fuel transportation volume [monitoring and tracking solution](#), and partners with [GRUBBRR®](#) to launch a self-ordering solution via the Anthem UX on Ovation fuel dispensers. In the same year, DFS launches [DX Promote® Auto](#) and [DX Power™](#).

2024

DFS launches [DFS Order Kiosk™ powered by FLYX](#), [ProGauge MagLink LX Ultimate® console](#), [RDM by DFS](#), [Synergy fuel site controller™](#), [DX Rewards™](#), and [Wayne PWR®](#) the first DFS EV charger for the US market. The same year DFS acquires [Bulloch technologies](#), a Canadian leader in integrated POS, forecourt control, payment and loyalty solutions.

2025

DFS announces global partnership with Bottomline and Bulloch POS enters the US market. In addition DFS launches 4Court Media™ and acquires Site iQ LLC, while the DFS Dundee manufacturing facility celebrates 30-year anniversary.

2026

DFS launches [DFS Crypto NOVA®](#), [ProGauge® LR120 Radar](#), [ProGauge® DMP™ MagRF](#), and [ProGauge MagLink Anywhere™](#) App in the same year as several momentous brand anniversaries - Wayne 135 years, Tokheim, 125 years, Fairbanks 30 years, and 10 years of DFS.
