Software Upgrade Instructions for a ProGauge MagLink LX Ultimate or MagLink LX Plus console

1. The Home Screen shown will come into view after you enter the IP Address into your browser.

2. Under Language selection, select your preferred language and push the **Enter** button. The Login Page will come into view.

3. Log into the console as Admin or Technician using the saved credentials and push **Login** and it will take you to the home screen.

4. Select **Maintenance** from the menu on the right, and then select **Utility** in the ribbon on the top of the screen to find location to update software.

5. Save the latest software zip file in an accessible location on your computer. The latest zip file can be downloaded from the **Downloads** section of the ProGauge MagLink console's webpages under the heading **Software and Firmware Downloads**

6. Click **Select Zip File** at the top of the utility screen and navigate to the zip folder within your computer and select **Open.**

7. Once the file has completed the upload process (may take a few minutes depending on the size of the update), click **Update** to initiate the software upgrade process (may take several minutes to apply the upgrade).

Note: The ProGauge MagLink LX console will reboot as part of the software upgrade process. The entire process for upgrading software will only take
